

"Our job is to meet the needs of our clients and their physicians. It is by this that we measure our success."

California Cryobank Embryo Storage

About California Cryobank

History

Founded in 1977 by Dr. Cappy Rothman and Dr. Charles Sims, CCB is guided by the traditional values and ethical principles of the medical profession. From our humble beginnings in a hospital closet, CCB has the largest and most diverse selection of semen donors with labs in Los Angeles, Palo Alto, CA and Cambridge, MA. CCB actively supports state and federal regulation of reproductive tissue banks and continues to be a voice for progressive change in safety and social matters.

Family Cord Blood Services

In 1997 CCB launched Family Cord Blood Services, a cord blood stem cell storage division designed to provide long-term health security to families around the world. FCBS is a founding member of the Association of Family Cord Blood Banks.

California Cryobank: Excellence in frozen tissue banking

- Industry leader in cell and reproductive tissue banking since 1977
- Nationally renowned physicians operate and own

Suffering from ESD (Embryo Storage Disorder)?

Common Symptoms Include:

- Limited Space
- Escalating Administrative Costs
- Increasing Legal Liability
- Increasing Regulatory Requirements
- Abandoned Embryos

An experienced Patient Support Team...

- On-site Medical Director and Genetic Counselors
- Expert staff trained in safety, internal SOPs, industry regulations and best practices to ensure the security of all embryos
- Dedicated Physician Services Representatives available to quickly answer any questions
- Caring Parent Services Representatives to assist with any patient needs

A 100% secured web based IT system allowing you to...

- Retrieve embryos quickly, efficiently and securely
- View status and history of stored embryos on-line
- View status of inbound or outbound shipments on-line
- Use electronic reports for shipping, handling and storage

Expert shipping services...

- End-to-end shipping, tracking and project management services
- Industry compliant packaging, labeling and documentation
- U.S. Department of Transportation compliant
- Complete shipping and handling including package tracking and temperature data log

A Lifetime of Tomorrows... Can be Stored Today

Comprehensive billing services...

- Complete handling of all billing and collections
- Accounting representatives trained to handle your patients' needs
- Abandoned embryo patient tracking service

Consider the California Cryobank Cure:

A 21,300 square foot state-of-the-art cryogenics facility in Los Angeles...

- An on-site 6000 gallon tank feeds a constant supply of liquid nitrogen keeping your embryos safely frozen
- All entrances are secured and monitored 24 hours a day so only authorized, trained professionals have access to embryos
- A specially designed fire/smoke detection and suppression system provides maximum protection in case of any emergency
- The steel reinforced building is designed to meet hospital and police station standards
- A fully independent hospital grade emergency generator supports all critical operations in the event of any power loss

California Cryobank operates under the industry's highest standards of excellence...

- FDA Compliant
- AATB Accredited
- AABB Accredited - cord blood and stem cells
- CLIA, CA & NY State Licensed
- OSHA Compliant
- Internal proprietary SOPs covering all aspects of our operation

"It is unclear how many embryos are stored at the nation's 450 fertility clinics. A 2003 study by RAND, Corp., a think tank, estimated there were 400,000...Some fertility doctors report storing embryos for a decade or more and say as many as 10% are abandoned"
