## Choosing the Right Sperm Bank Makes Choosing the Right Donor Easy

---

California Cryobank has been an innovator and leader in reproductive tissue banking since 1977.

Our reputation for outstanding quality and customer service has made us the #1 choice among physicians and their patients, servicing all 50 states and more than 40 countries worldwide.

We offer one of the industry's largest and most diverse selection of donors and donor information. Our highly qualified staff of medical directors, reproductive genetic specialists, and client service specialists provides the experience, care, and knowledge to assist you with all your donor sperm needs.

## Features & Benefits

### 45 years of experience

Our time-tested donor screening and specimen processing techniques have helped build more than 75,000 families.

### Donor selection

Our diverse catalog includes hundreds of donors that feature a variety of physical characteristics, ethnicities, religions, interests, and talents.

### Highly qualified staff

Our dedicated donor coordinators, laboratory scientists, reproductive genetic specialists, and medical directors have decades of experience helping grow families of all shapes and sizes.

### Post-conception services

Free newborn stem cell preservation through our sister company, Cord Blood Registry® (CBR®), access to our Sibling Registry, access to reproductive genetic specialists, and donor updates contribute to your family's well-being long after your baby is born.

### Quality assurance

By maintaining the industry's highest quality standards, we take every possible step to make sure you receive the safest specimen possible.

## Choosing Your Donor

---

We make finding your ideal donor easy:

- Our donors come from diverse ethnicities and varying educational backgrounds, including world-class universities such as UCLA, Stanford, Harvard, and others
- Anonymous and ID Disclosure Donors\*
- ICI, IUI, and IVF vials
- Comprehensive donor information, including extended donor profiles, DNA ancestry reports, medical histories, genetic test summaries, donor personal essays, staff impressions, childhood and adult photo series, "Express Yourself," facial features report, donor conversations, KeirseY Reports, and KeirseY Q&As
- Donor matching and genetic consultation services
- DNA Advantage® Donors have been screened for 260+ genetic conditions

Due to California Cryobank's Privacy Policy, the photos shown in the infographic at the top of this page are models and not actual donors.

## Our Donors

---

Being a California Cryobank donor means being the best. Less than 1% of applicants qualify. Applicants must:

- Possess a sperm count/motility in the top 15-20% of the population
- Test negative for chlamydia, syphilis, HIV, gonorrhea, HTLV, and hepatitis
- Complete multiple interviews with our Donor Department to assess suitability for the program and confirm medical, educational, and personal information
- Complete genetic screening for over 260 conditions and have family medical history evaluated by our reproductive genetic specialists
- Complete a clinical psychological assessment and criminal background check
- Have their chart reviewed by a Quality and Medical Director

## Discover More with DNA Ancestry

---

Ever wonder where a donor's ancestors came from? We created DNA Ancestry to provide an extra layer of information about your donor while protecting the privacy of everyone involved.

- Ancestry data for 26 unique geographic regions and ethnic groups<sup>1</sup>
- Maintains donor privacy protections while maximizing information
- Partnered with SEMA4 to perform DNA testing

# Steps to Purchasing Donor Sperm

---

We would love to support you on your journey to parenthood. Follow these 5 steps to get started:

## 1 Sign Up on Our Website

- Register online for a free account
- Start browsing our donor catalog

## 2 Discuss with Your Physician

- How many vials to order
- Which vial type to order (ICI, IUI, or IVF)
- Your genetic carrier screening results

## 3 Choose Your Ideal Donor

- Upgrade your donor information subscription for more information
- Schedule a genetic consultation (optional)
- Review donors' genetic screening results (GTS) with your physician

## 4 Purchase Your Vials

- Complete account forms
- Select your donor and order vials
- Donors sell out quickly, so order enough vials for additional cycles or possible siblings and store through our long-term storage program

## 5 Schedule Shipment

- When you're ready, schedule your shipment to arrive at least two days in advance of your procedure

## Additional Benefits

---

Vial shipments for at-home inseminations

Free newborn stem cell preservation

Through our sister company, CBR®, you will receive **FREE cord blood and cord tissue processing, plus one year of storage** (a \$2,860 value). After that, you just pay the annual storage of \$195 per sample\*\*

\*California Cryobank is proud to offer "ID Disclosure Donors" in addition to our Open and Anonymous Donors. By selecting an ID Disclosure Donor, your child will have access to the donor's name, last known contact information, and date of birth once they reach age 18. It's important to note that ID Disclosure programs vary from bank to bank. Not all banks provide the donor's name and/or contact information once a child reaches 18.

\*\*After the first year, clients are responsible for storage. Patients can choose to renew storage each year, or they can save on 18-year or lifetime options.

The use of cord blood is determined by the treating physician and is influenced by many factors, including the patient's medical condition, the characteristics of the sample, and whether the cord blood should come from the patient or an appropriately matched donor. Cord blood has established uses in transplant medicine; however, its use in regenerative medicine is still being researched. There is no guarantee that potential medical applications being studied in the laboratory or clinical trials will become available.

Cord tissue use is still in early research stages, and there is no guarantee that treatments using cord tissue will be available in the future. Cord tissue is stored whole. Additional processing prior to use will be required to extract and prepare any of the multiple cell types from cryopreserved cord tissue. Cbr Systems, Inc.'s activities for New York State residents are limited to collection of umbilical cord tissue and long-term storage of umbilical cord-derived stem cells. Cbr Systems, Inc.'s possession of a New York State license for such collection and long-term storage does not indicate approval or endorsement of possible future uses or future suitability of these cells.
